

## Information for Statewide Correspondence Schools needing its students to take the SAT School Day test at a local host high school

### SAT School Day (February 25, 2015)

- Statewide Correspondence Schools must contact SAT School Day representative Denise Zaveleta (855-769-3122) in order to complete the SAT Test Center Information Form (TCIF).
  - A Statewide Correspondence School must know in which communities it has students needing to take the SAT School Day. Denise Zaveleta knows which communities offer the SAT School Day, the name of the local host high school (this high school name is needed to complete the TCIF), and the contact information for the local host high school Test Center Supervisor.
- After stating (on the TCIF) the # of students who will test with other districts, the Statewide Correspondence School will receive SAT School Day vouchers and will then get the voucher information to its students (can mail the voucher, scan/email the voucher information, etc.) in order for the student to register online. SAT (College Board) begins mailing vouchers on December 1, 2014.
  - Online registration window for the SAT School Day is December 10, 2014-February 11, 2015.
  - **A Statewide Correspondence School student must remember to enter his/her Attending Institution (AI) high school code (020353 for I.D.E.A. students, e.g.) when prompted during the online registration process.**
  - After entering the accurate AI code, the student will see a listing of all the SAT School Day testing sites that were entered on the TCIF. The student should recognize the local host high school name in that list and choose it (the student cannot hand type a local high school test center code #; the local host school can only be entered via the TCIF).
    - Choosing this local high school from that list is what tells SAT (College Board) to mail a paper/pencil SAT School Day test to that local host high school. And since the student entered the Statewide Correspondence School's AI code during the registration process that student's results are sent to the Statewide Correspondence School's district.
  - Online registration takes approximately an hour and can be done wherever the student can access an internet-connected computer.
  - Photographs are not required for SAT School Day online registration.
- Statewide Correspondence School students **MUST bring to the SAT School Day test the following:** registration ticket (printed during online registration process), photo ID, #2-type pencils, recommended calculator (<http://sat.collegeboard.org/register/calculator-policy>).

- Statewide Correspondence School students arrive at the local host school at 7:45AM on February 25, 2015. The SAT School Day test should be finished at approximately 12:30PM.
- After registering online, both SAT School Day and January SAT Nat'l Test Day students should be able to get free access to an online prep course (normally \$69.95). Contact Denise Zavelata if you need help getting students access to the prep course. Oct. (Saturday) & May (Sat. & Sunday) SAT Nat'l Test Day students do not get free access to the prep course. All SAT students do have the chance to receive the following free practice opportunities from the College Board at <http://sat.collegeboard.org/practice/>
  - Question of the day: (can be sent to smart phone)
  - Sample practice Questions
  - Answers Imagined
- Unlike with the SAT Nat'l Test Days in Oct. & May, neither SAT School Day nor January SAT Nat'l Test Day students have the option of paying \$18.00 to receive a post-test score report letting them know their correct and incorrect answers.
  - This SAT Question-and-Answer (QAS) service for certain SAT Nat'l Test Day administrations includes the response to each question and the correct answer, information about the type of question and level of difficulty, and scoring guidelines. QAS is available only for the October (Saturday) and May (Saturday and Sunday) SAT Nat'l Test Days.
  - For the SAT School Day & the January SAT Nat'l Test Day... the SAT Skills Insight free resource (<http://sat.collegeboard.org/practice/sat-skills-insight>) provides students and parents information about academic skills at different score points.

#### SAT National Test Days:

- Please contact Nancy Potter (Alaska's SAT Coordinator) regarding any SAT Nat'l Test Day questions
